$\qquad$

1. Given the graph below, identify the sequence of transformations used to map $\triangle G M E$ onto $\triangle G^{\prime \prime} M^{\prime \prime} E^{\prime \prime}$.

2. Given the graph below, identify the sequence of transformations used to map $\triangle R B V$ onto $\triangle R^{\prime \prime} B^{\prime \prime} V^{\prime \prime}$.

3. Given the graph below, identify the sequence of transformations used to map $\triangle A W C$ onto $\triangle A^{\prime \prime} W^{\prime \prime} C^{\prime \prime}$.

4. Given the graph below, identify the sequence of transformations used to map $\triangle R Z G$ onto $\triangle R^{\prime \prime} Z^{\prime \prime} G^{\prime \prime}$.

5. Given the graph below, identify the sequence of transformations used to map $\triangle I D V$ onto $\triangle I^{\prime \prime} D^{\prime \prime} V^{\prime \prime}$.

6. Given the graph below, identify the sequence of transformations used to map $\triangle R Y P$ onto $\triangle R^{\prime \prime} Y^{\prime \prime} P^{\prime \prime}$.

7. Given the graph below, identify the sequence of transformations used to map $\triangle G D A$ onto $\triangle G^{\prime \prime} D^{\prime \prime} A^{\prime \prime}$.

8. Given the graph below, identify the sequence of transformations used to map $\triangle S M D$ onto $\triangle S^{\prime \prime} M^{\prime \prime} D^{\prime \prime}$.

9. Given the graph below, identify the sequence of transformations used to map $\triangle U I N$ onto $\triangle U^{\prime \prime} I^{\prime \prime} N^{\prime \prime}$.

10. Given the graph below, identify the sequence of transformations used to map $\triangle H C E$ onto $\triangle H^{\prime \prime} C^{\prime \prime} E^{\prime \prime}$.

11. Given the graph below, identify the sequence of transformations used to map $\triangle E S A$ onto $\triangle E^{\prime \prime} S^{\prime \prime} A^{\prime \prime}$.

12. Given the graph below, identify the sequence of transformations used to map $\triangle B K X$ onto $\triangle B^{\prime \prime} K^{\prime \prime} X^{\prime \prime}$.

13. Given the graph below, identify the sequence of transformations used to map $\triangle H M T$ onto $\triangle H^{\prime \prime} M^{\prime \prime} T^{\prime \prime}$.

14. Given the graph below, identify the sequence of transformations used to map $\triangle R S N$ onto $\triangle R^{\prime \prime} S^{\prime \prime} N^{\prime \prime}$.

15. Given the graph below, identify the sequence of transformations used to map $\triangle I X Z$ onto $\triangle I^{\prime \prime} X^{\prime \prime} Z^{\prime \prime}$.

16. Given the graph below, identify the sequence of transformations used to map $\triangle E K W$ onto $\triangle E^{\prime \prime} K^{\prime \prime} W^{\prime \prime}$.

17. Given the graph below, identify the sequence of transformations used to map $\triangle O S U$ onto $\triangle O^{\prime \prime} S^{\prime \prime} U^{\prime \prime}$.

18. Given the graph below, identify the sequence of transformations used to map $\triangle I C R$ onto $\triangle I^{\prime \prime} C^{\prime \prime} R^{\prime \prime}$.

19. Given the graph below, identify the sequence of transformations used to map $\triangle A I P$ onto $\triangle A^{\prime \prime} I^{\prime \prime} P^{\prime \prime}$.

20. Given the graph below, identify the sequence of transformations used to map $\triangle Z O K$ onto $\triangle Z^{\prime \prime} O^{\prime \prime} K^{\prime \prime}$.

21. Given the graph below, identify the sequence of transformations used to map $\triangle B U C$ onto $\triangle H G F$.

22. Given the graph below, identify the sequence of transformations used to map $\triangle D T V$ onto $\triangle Y L M$.

23. Given the graph below, identify the sequence of transformations used to map $\triangle R I K$ onto $\triangle F Y P$.

24. Given the graph below, identify the sequence of transformations used to map $\triangle R M W$ onto $\triangle O V S$.

$\qquad$
25. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
26. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
27. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
28. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
29. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
30. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
31. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
32. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
33. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
34. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
35. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
36. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
37. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
38. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
39. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
40. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
41. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
42. There are lots of different ways, but two transformations that you might use are translation and reflection. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
43. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
44. There are lots of different ways, but two transformations that you might use are translation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
45. There are lots of different ways, but two transformations that you might use are reflection and translation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
46. There are lots of different ways, but two transformations that you might use are reflection and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
47. There are lots of different ways, but two transformations that you might use are rotation and rotation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
48. There are lots of different ways, but two transformations that you might use are rotation and translation. Also YOU NEED DETAILS. Since there are so many different ways, I will not write them all here.
